Debugging

Soft Skills:

Problem Solving

Team Collaboration

PROJECTS

Featured

Mexi Medicals – Medical E-commerce Platform

- Developed a responsive e-commerce platform for browsing and purchasing medical products.
- Built reusable React components for product listings, shopping cart, and navigation.
- Implemented dynamic product rendering and state management for a seamless shopping experience.
- Designed a mobile-friendly interface with a focus on usability and performance.
- Integrated frontend components with backend APIs for product and user data.

Technologies: React, JavaScript, HTML5, CSS3, Node.js, Express.js, MongoDB

CorperCompass (MVP)

Collaborated with a team of developers to build **CorperCompass**, a minimum viable product (MVP) designed to help NYSC members easily access useful information and resources during their service year.

Key Contributions

- Participated in developing the frontend interface for the application.
- Collaborated with team members to implement user-focused features.
- Contributed to creating a responsive and user-friendly interface.
- Implemented client-side form validation to ensure accurate user input before submission.

- Integrated frontend forms with backend services to handle data submission and responses.
- Took part in team discussions and iterative development of the product.

Technologies: HTML, CSS, JavaScript

To-Do List Web App

Built a task management web application that allows users to add, delete, and manage tasks.

Key Features

- Add and remove tasks dynamically
- Interactive user interface
- JavaScript-based DOM manipulation

Technologies: HTML, CSS, JavaScript
